## ONSITE INSPECTIONS (only available in CA, NV, AZ & UT)

We provide comprehensive on-site inspections, performed by experienced and well-qualified safety inspectors. Your inspection can include the following elements:

### On-site Visit and Walk-through of your Facility

- Review of your safety program
- Review of your training programs
- On-the-spot consultation to:
  - Correct or abate hazards
  - Improve safety operations
  - Maintain ongoing compliance
- Identification of possible hazards
- Identification of machine guarding hazards
- Summary of evaluation report, including:
  - Photos, tied to OSHA regulations
  - Instructions to abate/correct identified hazards

## ONSITE TRAINING (only available in CA, NV, AZ & UT)

OSHA Requires that every company provide their employees with regular safety lessons. As an ongoing client, you will receive these mandatory lesson materials and expert support to maintain your safety training program. On-site lessons will be delivered by a qualified and experienced safety trainer. Your training can include the following elements:

- Lessons delivered in English or Spanish
- Safety Tailgate Meeting Materials
- Over 1,200 safety topics available
- Management Responsibility Lessons
- Workplace Hazard Identification Procedure

## OSHA Documentation Creation

Your documentation will be written exclusively for your company and your industry. Your documentation will also address the general types of equipment you may use, the types of hazards your employees are exposed to, how to identify hazards, what to do in case of certain types of injuries, and how to avoid them. We will keep your safety programs current with OSHA regulations for the life of your account.

You will have access to all of your customized documentation online at [www.GotSafety.com](http://www.GotSafety.com).

### We will write and update all documentation listed below as needed.
