

KPA Flex for Construction Safety

Flex helps general contractors, electrical contractors, mechanical contractors, and many more trades gain visibility over safety programs, eliminate manual processes, and foster a culture of safety.

It's about ease of use. It's time and cost-saving. It's real-time data. The ability to filter down to specific issues, specific people, and specific sites.

Jim Cosgrave, Safety Manager,
4Cs Construction

Better Visibility

- ◆ Capture insights from job sites and the field with mobile capability.
- ◆ Provide real-time information with advanced reporting and dashboards.
- ◆ Gain confidence over safety program operations and record keeping.

Streamlined Efficiency

- ◆ Track equipment and initiatives tied to your projects.
- ◆ Assign tasks and training to different groups with the click of a button.
- ◆ Integrate safety program data into your existing construction management systems seamlessly.

Tailored Solutions

- ◆ Leverage safety training topics, pre-built toolbox talks, and safety forms.
- ◆ Tackle unique safety program challenges with enhanced configurability.
- ◆ Respond to incidents and issues quickly with software built by construction safety experts.

KPA provides Environment, Health, and Safety (EHS) software, consulting, and award-winning online training to help contractors stay compliant and maintain a safe and productive jobsite. The [KPA Flex software](#) platform is easy to use, highly configurable, and designed for a mobile construction workforce, which encourages broad adoption and an improved culture of safety. For over 30 years, KPA has helped 15,000+ clients comply with regulations, reduce costs, and increase productivity.

**INTEGRATE WITH
YOUR CORE SYSTEMS**

Managing construction safety has never been easier than with KPA Flex

Safety Management	Key processes such as tasks, assignments, inspections, incident management, and critical work are highlighted.
Targeted Construction Training	Customizable training modules, like ladder safety and fall protection, accessible on mobile for on-site training needs.
Mobile Accessibility	Foster enhanced communication and accurate data recording in real time with a mobile application.
Intelligent Equipment Management	Filter equipment by project and map forms to equipment seamlessly.
Structured Forms System	Organize configurable and prebuilt forms in a structured folder system for easy access.
Customized Construction Workflows	Adapt the software to your project-specific requirements across multiple jobsites.
Resource Library & SDS Manager	Centralized access to safety data sheets and resources for quick reference and streamlined compliance management.
Safety Project Tracking	Project tracking and reporting features align your specific operations with strategic oversight.
Advanced Reporting	Track trends as well as leading and lagging indicators with advanced reporting for better decision making and record keeping.
Third-Party Construction Integrations	Easily connect KPA Flex with construction solutions including Rivet, Procure, and Spectrum for data and operational integrity.
